TI - ICE CREAM CONTAINING CACTUS COMPONENT AND ITS PREPARATION  
AB - PURPOSE: To obtain an ice cream containing a cactus component and having intestinal disorder controlling action and obesity preventing action.  
- CONSTITUTION: This ice cream containing a cactus component is a unique ice cream incorporated with a cactus component such as finely cut pieces or juice of the thorns or stalks of cactus. Among various cactus components, a fermentation extraction liquid of cactus prepared by decomposing a grated or cut cactus stalks with a decomposing enzyme and fermenting and extracting the decomposition product causes sufficient overrun without inhibiting the whipping of ice cream to enable the preparation of the ice cream containing a cactus component. An ice cream containing a cactus component and incorporated with a fermentation extraction liquid of cactus is free from grassy cactus smell, exhibits luxury delicious taste with refreshing aftertaste and gives a dairy product such as ice cream having sufficiently whipped texture and smooth palatability.
